

Professional Level Professional Development

EASE ADOPTION

IMPLEMENT BEST PRACTICES

IMPROVE KNOWLEDGE TRANSFER

Centric Learning is the only person centered professional development platform. Individualize your existing educational content and deliver it how, when and where it's needed.

One of the biggest goals for dental manufacturers is increasing product adoption. Skills learned during multi-day seminars are often forgotten or not communicated effectively to the rest of the dental team.

With Centric Learning, manufacturers can bridge this gap by providing training closer to the point of execution. Training can be assigned based on the individual's role and existing knowledge base. Integrating learning into the day-to-day operations of a practice helps make learning new processes seamless; thereby, increasing the chances of long-term adoption.

BENEFITS OF CENTRIC LEARNING

Influence product adoption closer to the point of use

Identify inconsistencies in professional skills and competencies

Monitor engagement levels with detailed user interaction reports

Align and award CE credits to demonstrated skills and competencies

Use and customize existing content based on participants' role

Simple & Powerful

By focusing only on what's needed, we've created an experience that doesn't get in the way of learning

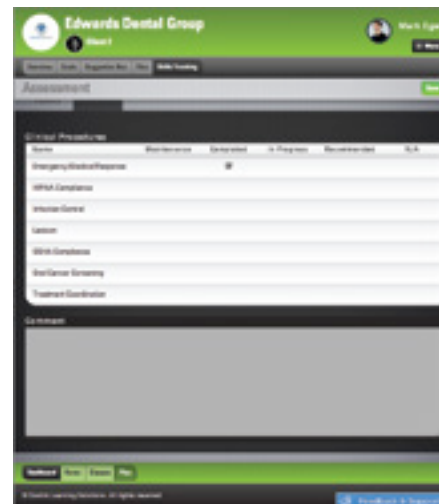

INDEPENDENT LEARNING

- On-Demand Learning Materials
- Interactive Instructor Feedback
- Automated Skills Tracking
- Personalized Learning Plans
